

April Meeting Soil Testing

→ Texture

→ pH is *IMPORTANT*

Bring a sample from your garden

All you need is a half cup of soil from each area
you would like to have tested.
Keep your samples separate for each area.

Veggie Garden

Flower Garden

Lawn

1. Dig down 3 - 4 inches
2. Take a few samples from various spots
(within the one area you want to test)
3. Combine them into a single container
